

YANMAR

Richard Ward

Yanmar - simply the best there is.

“Our line of Seawind catamarans are high quality boats built for very discerning customers. Since we have been manufacturing the Seawind range I have fitted Yanmar diesel engines to every single inboard powered boat... but one!

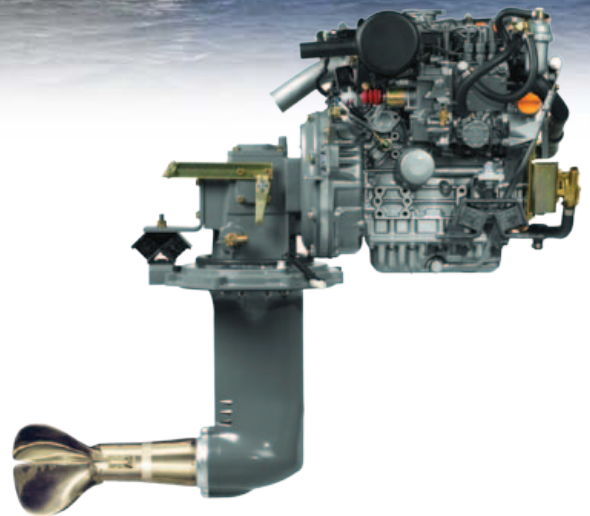

That’s over 300 Yanmar Saildrive diesel engines installed.

I choose Yanmar because of their high quality, exceptional after sales support and 100% acceptance by Seawind customers who inevitably head off to cruise remote and distant locations the world over.

The Yanmar 3YM30 has never given us any issues with fumes, noise or oil leaks. When matched with the renowned Gori 3 blade folding propeller with its unique overdrive the end result is a premium quality no fuss propulsion system that delivers on all counts for our owners.

We’ve specified the Yanmar Saildrive in our Seawind 1250 model, because it’s simply the best there is.”

Richard Ward
Seawind Catamarans

Yanmar 3YM30 Series
29mhp (21.3 kW)

- Envious power & torque output
- Outstanding power-to-weight performance
- Low noise, low vibration & typical Yanmar reliability
- Class leading fuel economy
